No.59

Office of the Chairman of the Board of
Trustees, for the Mysore City Improvement
Mysore Dated 28 April 1904.

From

D.Sitaram Rao Esq.,
Chairman of the Boadrd of Trustees,
MysoreCity Improvement.

To

L.Anathasami Rao Esq., B.A.
Secretary ro the Govt. of H.H. the Maharajah of
Mysore, General and Revenue Departments.

Sir,

I have the honor to submit for favourable con-sideration and early sanction of Government an estimate for the Improvements of the Ittigigud Block of Nazarbad Mohalla of the Mysore City amounting to Rs. ~~52,995~~ 52,906/-.

2. A full description of Ittegegud is given in the Mysore City Improvement Sub-Committee's report No.22 of 11th August 1903. As observed by the Sub-Committe, the area is congested and the Drainage is very defective and all the houses skirting the water spread of the Doddakare are altogether insanitary and can be declared to be unfit for occupation. The present Estimate deals fully with the requisite drainage works and the opening of the congested portions and ~~in~~ the removal of all houses considered insanitary. A broad road is also proposed to be opened on the margin of the Tank storage at its highest level to limit the area to be built upon and also to give a pleasant drivable road to the race-course. A notification published in the Mysore Gazette dated 2-2-'04 gives succiently the Improvements proposed to be undertaken in the area. Copies of the Mysore City Improvement Sub-Committee's report and of the Notifications are enclosed for ready reference.

3. The Estimate amount is made up of the items as noted below;-

No.I. Compensation for the acquisition of property.Rs.22366/

No.II. Dismantling the acquired insanitary houses and removing the debris Rs.1684/4

No.III. Cutting, farming, and gravelling of roads newly to be opened ... ... Rs.~~2068~~/1976

No.IV. Building of drains and works relating there-to including dust bins Rs.26880/

Total ... ...Rs.~~52995~~/52906

In estimating compensation amount it is to be noted that no credit is taken of the amount that would be realised on the sale of the roofing and other materials of the buildings to be acquired, as no definite Estimate could be framed. The amount so realised would be brought under Trust Funds as per section 26 of the Regulation.

4. The Notification drawn up on the completion of the Ittegigud Improvement Scheme was duly communicated to the President of the Mysore Municipality, and the Commissioners generally approve the scheme and no special requisition is received.

5. The Improvements necessitate the acquisition of /20 properties either wholly or in part, and Registers giving their details and other informations required under section 17 (c) and (e) of the Regulation also accompany. except in a few cases most of the property owners are not antagonistic to the proposed Improvements and giving up their properties.

6. The execution of the proposed Improvements & the filling in of the northern arm of Doddakere for which an Estimate amounting to Rs.402/9 is, I believe before Government thro. the P.W.D. Secretary, will considerably improve the sanitary conditions of Ittegigud generally and the Pleasure Palace, and its environs in particular.

(7) A comparative statement showing the deviations from the original estimate is appended.

8. Plans and details of the works proposed to be undertaken are enclosed.

9. I solicit early sanction to the Estimate to work up a portion of this years grant in buying up the pro-perties

properties required.

I have started the construction of drains in anticipation wherever feasible without the acquisition of houses.

I have the honor to be,

Sir,

Your most obedient servant,

D. Stevenson

Chairman.

B.R.

G Sm

Notification dated 2nd February 1904.

ITTEGEGUD.

In accordance with Section 16 (1) of Regulation No. III of 1903 for the improvement of the City of Mysore, a scheme has been prepared for the area known as Ittegegud in Nazarbad Mohalla. The area is bounded on the north by Cooppanna's gardens, on the east by Mooneswara temple road and on the south and west by the Doddakere water spread. The area is divided into three drainage blocks bearing Nos. 39, 40 and 71. Particulars of the scheme, a map of the area comprised therein, and a statement specifying the land proposed to be acquired may be seen between 11 A.M. and 5 P.M. on office days at the Chairman's office now being held in the premises known as Lacey's Court.

2. The improvements consist of—

(1) The construction of drains and the diversion of sewage, at present polluting Doddakere to Captain Purchase's open drain in the ditch to the east of the Fort.

(2) The opening out of new roads, the widening of existing lanes and the entire removal of insanitary huts to relieve congestion.

(3) The provision of four public *latrines of 12 seats each.*

Details of new roads to be opened and the improvement of existing lanes.

Block No. 39.—In all six roads the most important of which is a road running from north to south parallel to Mooneswara temple road, and to the west of it.

Block No. 40.—Six roads of minor importance will be dealt with. A drivable road in prolongation of the westernmost road, in this block is proposed to be opened keeping it sufficiently high above the water spread of Doddakere to meet the Race-course road very near the tunnel across the Karanji tank drainage.

Block No. 71.—Will be dealt with by the bodily removal of insanitary dhobi huts and the opening of four minor roads.

D. SITARAM RAO,
Chairman of the Board of Trustees, Mysore.

The Mysore City Improvement Sub-Committee's proposals for the Improvement of the Nazarabad Mohalla, including Ittigegud.

No. 22.

To

THE PRESIDENT,

Mysore City Improvement Committee.

SIR,

In continuation of our report of the 8th ultimo we have the honor to submit our proposals for the improvement of the Nazarabad Mohalla including Ittigegud. This Mohalla forms part of the third of the 5 drainage areas referred to in para 1 of our last report. But it requires independent treatment, and we therefore deal with it separately. There are reasons for dealing with it at an early date. The Summer Palace is located in the quarter, a large quantity of sewage flows at present direct into the Doddakere from Ittigegud and the existing arrangement by which all the sewage of the Nazarabad Bazaar drains into a small pond close to the Nazarabad high road is most insanitary and a standing menace to the public health. Further it is the only area which is not provided with a main sewer.

Ittigegud consists of a small, more or less rectangular area of some 22 acres in extent, bounded on the east by Muneswara temple road and the Pleasure Palace, and on the west by the Dodkere. The Pleasure Palace road traverses it near the northern extremity. The houses, though of no great size, are many of them substantial masonry structures. Mingled with the better class houses are others of all the inferior descriptions, and the southern side is occupied generally by huts of the meanest description. The drainage is effected by V-drains made of stone slabs and by earthen drains, and in a few instances the residents have paved the narrow gullies with concrete, to carry off the sullage and other water. The whole of the drainage carried by these drains falls into the Dodkere, or its margin, and in time of heavy rain is swept into the main body of water. A few fairly broad streets traverse the quarter, but the side lanes and gullies are very narrow and insanitary and the whole area is highly congested.

Proposed Improvements.—*Drainage.* Mr. D'Cruz has provided surface drains similar to those proposed for No. 1 area, a main pipe drain contouring the extreme west of the area; passing down the Pleasure Palace road and falling into the existing open masonry sewage drain to the east of the Fort, and a sub-main intercepting the drainage from the area to the east of Arunachala Mudaliar street. This sub-main is also intended to carry, if necessary, the sewage from the Pleasure Palace, the Zoo, the stables and the Karanji Military lines. The carrying of the Ittigegud sewage into the drain to the east of the Fort will involve the remodelling of the latter drain, including enlargement of the outfall pipe and conversion of the open drain into a closed one.

For the relief of congestion, in addition to the widening of existing lanes and the opening out of new ones, we recommend the entire removal of the insanitary huts forming the two southernmost blocks, the reallotment of the sites and reconstruction. A whole block in front of the Serial No. 35, Sheet No. 40, is recommended for removal and for the forming of an open space. Crossing the Pleasure Palace road we recommend the clearance and reconstruction of the block known as the Dhobies' patch, the present condition of which is hopelessly insanitary and beyond all improvement except by the most drastic measures. We believe that provision can be made for the households displaced on sites to be cleared or immediately adjoining. That question will necessarily have to be considered and decided by the executive body. A further matter for consideration by that body is the running of a broad driving road along the south-west of the block in connection with a scheme with which you are familiar.

The necessary statement of cost, &c., are appended of which the following is a brief summary—

Description.—Nazarabad is in the valley between the spurs on which are situated the Upper and Lower Residencies.

It lies to the north of Ittigegud and the Pleasure Palace. The Halle Nazarabad road bounds it on the east, the old Idiga road on the north-west and the Residency road on the west.

The contours on the tracing submitted indicate two distinct valleys which unite near the intersection of Bakshi Narasappa's and Balaram Singh's bungalow streets, and form a basin sloping easily to the Dodkere through Kuppana's gardens.

The Nazarabad High road traverses the locality from east to west and lends an importance to this quarter of the town, as the road is the main approach to the Upper Residency and the route usually adopted between the latter and the Palace and Lower Residency. It is also the main line of communication between the town and the villages to the east of it.

Houses.—The houses in this area except (1) a few that lie along the Nazarabad high road, (2) the bungalows situated on the same road, and on the Residency road, and (3) a few of a respectable class in the interior of the area, are of the usual type occupied by the servant and labouring classes.

There is a goodly number of Palace servants in the congested portion of the area and with them are to be found potters, milkmen, gardeners, dhobies, chucklers, syces, coolies &c. Mahomedans, Mahrattas, Rajputs, Vakkaligars, Koramas, Kumbars and Pariahs are represented in the native population of the area. Separated from the congested parts of Nazarabad sometimes only by a road are the bungalows occupied by Europeans and Eurasians of whom some are in the employ of the Palace and the Deputy Commissioner's bungalow.

There is an area of 7½ acres abutting on the Nazarabad high road which is used for growing vegetables irrigated with the sewage and sullage waters which collect in the pond already referred to.

The existing flood water drains are partly of slabs and partly earth drains revetted in places, the street drains are some of them slabbed V or ⌴ drains. The sewage is in part intercepted by a pipe drain along Bakshi Narasappa's street and diverted from the main drain following the Nazarabad high road through a lane to the south of Balaram Singh's bungalow street, into the pond in the centre of the vegetable gardens.

Proposed Drainage.—Proposals for draining the locality are on the lines adopted for Ittigegud, *i.e.*, the replacing of the leaky slabbed drains by open surface drains of the semi-peg top pattern that would not leak and the interception of sewage by pipe mains and sub-mains. The proposed pipe main will be laid along the bed of the main valley up to the Nazarabad road, which it will follow up to the Residency road, it will then turn south for some distance parallel to the latter and again taking a westerly turn along the small cross road fall into the existing open main

sewer. The main would receive three sub-mains, one down the minor of the two natural valleys referred to, another down the Nazar high road and one behind the bungalows on the Residency road. The storm water will pass over leaping weirs into the existing storm water drains.

Removal of Congestion.—While approving of Mr. D'Cruz's proposals for opening out new roads, widening existing ones, dismantling insanitary houses &c., we have proposed the bodily removal of certain insanitary clusters of low huts with a view to reallotting the sites and, if required, building sanitary lines for the people displaced. Our proposals are detailed in the Sub-Committee's Proceedings of the 9th instant.

With regard to housing the people displaced, it is believed that there will be enough space for the purpose in and round the area built upon if the necessary acquisition, realignment and reallotment is carried out.

The accompanying statements furnish information under the following heads:—

1. Cost of improvements under various sub-heads. (Sent by Assistant Engineer).
2. Of the degree of congestion per acre.
3. Houses to be dismantled and people displaced castewar. (Sent by Assistant Engineer).
4. The number of sites that can be provided in lands to be acquired and reallotted.
5. The number and types of houses proposed to be built for the displaced population. (Sent with project by Assistant Engineer).

We have &c.,

for Actg Secretary

AB 7/5/04

Project for the improvement of the Ittigegud Block of the Nazarbad Mohalla, Jeypore City.

Estimates	Discrepancies observed
1. Dismantling ~~of houses~~ and removing debris from houses acquired to widen the South Road in Ittigegud.	The amount of Rs 372 entered in the estimate seems correct. Why it has been corrected in pencil to Rs 368 and the latter figure adopted in the ~~abstra~~ final Abstract Estimate is not understood.
2. Abstract Estimate for dismantling houses and removing debris at Ittigegud	The total cost comes to Rs 1312 but not to Rs 1313, the correct cost of dismantling 373 cyds of mudwall @ 1 anna per Cyd being Rs 23 and not Rs 24 as entered.
3. Estimate of the probable cost of earthwork to be done for the proposed road to the South of Ittigegud.	~~The correct total cost amounts to Rs 1700 and not to Rs 1800~~ The rate or amount is not given in this estimate but on the facing sheet thereof, the amount is entered as Rs 1800, which appears to be the aggregate cost of this estimate (Rs 503) and of earthwork for other roads to the South of Ittigegud.
4. Constructing Road Tunnel at Ittigegud	Lump Sum of Rs 245 entered in the Abstract Estimate does not find a place in the detailed estimate.

5. Estimate of the cost of earthwork for the proposed and existing roads to the South of Ithigegud.

The correct total cost amounts to Rs 1708 and not to Rs 1800. The cost of 3503 cyds of earthwork at 2 as per cyd is Rs 437-8 and not Rs 526 as erroneously entered.

6. Hardening and Gravelling roads in Ithigegud.

Hone 4080 sq yds have been carried out cannot be measured as details have not been given.

7. Drainage of Ithigegud Inchalla.

Construction of Silk bags

Earthwork. Not entered in Rs 18; the correct cost Rs 16.

Constructing Stone Over flows

Machine ground Surki mortar plastering with cement rendering. The figures entered are 21 X 4.25 = .6657 Sqrs @ 4-12-a. Cost Rs 3.

There has been no uniformity in the calculations of the boards not been mentioned items one of the items is evidently incorrect

Constructing Culverts of 12 deals

Machine ground Surki mortar plastering. The figures entered are 4 X 25.66 = 102.64 Sqrs @ 3-0 a Cost Rs 308.

Construction of Stone Over flows and leaping weirs

Rs 350 entered on this account in the abstract estimate is not found in the detailed estimate wherein Rs 28 and Rs 20 respectively or 48 Rs in all are provided.

No 67 Encls, one file of Estimates & an Explanatory note

Office of the Chairman of the Board of Trustees,
for the Mysore City Improvements,
Dated, Mysore, 11th May 1904.

From

D.Sitaram Rao Esq.,
Chairman of the Board of Trustees,
Mysore City Improvements.

To

L.Ananthasami Rao Esq.,B.A.
Secretary to the Govt. of H.H. the Maharajah of
Mysore, General & Revenue Departments.

Sir,

With reference to Secretary's Docket No.4278 /106-'03 dated 10th May 1904, returning the Project for the Improvement of the Ittegegud Block of the Nazarbad Mohalla Mysore City and calling for certain explanations, I have the honor to resubmit the project with a fresh abstract and an Explanatory Memo. dealing in full on the discrepancies noticed.

The Draftsman and the Clerks responsible for the omissions and for errors in arithmetical calculations have been severely warned. I solicit an early sanction to th Estimate to acquire the properties.

I have the honor to be.

Sir,

Your most obedient servant,

D. Sitaramarao

Chairman

B.R.

Explanatory note for the discrepancies noticed.

Query No.1. The figure Rs.372/- is correct and not Rs.368/-. In the general abstract also the same figure should have been entered.

..do.. No.2. The total cost as corrected is Rs.1312/-

..do.. No.3. Detailed estimates are given for each of the roads intended to be improved. The amount of Rs.1,976/- entered in the abstract estimate is made up of the following items:-

Estimate No.I.	...	Rs.780/-.
...do... No.II.	...	Rs.528/-.
...do... No.III.	....	Rs.400/-.
...do... No.IV.	...	Rs.268/-.
Total	...	Rs.1976/.

..do.. No.4. Details are not worked out for the amount of Rs.245/- provided for opening "Road dams" whereever necessary. The amount may be allowed to stand.

..do.. No.5. The office copy of the estimate contains 4,211 c.yds. under earth work costing Rs.526/-. The quantity was corrected to 3,503 c.yds. but failed to correct the cost. hence the error. The quantity as entered 3,503 c.yds. and the corrected cost Rs.438/- are correct.

..do.. No,6. The length of the lanes where the drains are proposed to be constructed are taken and the quantity is arrived at. Details were considered unnecessary and so not furnished. The item may be allowed.

..do.. No.7. Construction of silt traps . The correct

correct cost is Rs.16/- and not Rs.18/- as noted in the details.

Construction of storm overflows. Plaster-ing with machine ground Surki-mortar and ren-dering it with cement.

The quantity entered must be 21×3.17 sq.ft. and not 21×4.25 as incorrectly copied. The result noted 0.6657 squares & at Rs.4-12-0 per square - Rs.3/- is correct.

Constructing latrines of 12 seats. Ma-chine ground Surki-mortar plastering.

The figures entered Nos.4×25.66 squares = 102.64 squares, is correct and @ Rs.3/- per square comes upto 307.92 or Rs.308/-.

Construction of storm overflows & leap-ing weirs.

The original estimate provided Rs.350/- lump sum for both the items. Details are now worked out. It is proposed to construct 7 storm overflows @ Rs.30/- = Rs.210/- and 7 leaping wiers @ Rs.20/ = Rs.140/- . Total Rs.350/-.

Mysore.

3. Lodge Extension

Sir,

In returning herewith in original with ~~reference~~ enclosures the marginally noted estimates received with your Nos 4331/ 36-02 , 4332 / 106-03 and 4333 / 106-03 dated 12th instant I have the honour to inform you that the above estimates have been duly checked in my offfce and the necessary alterations made in red ink. So far as I can see the provisions in these estimates are much the same as those provided for in the estimates already submitted to the Dewan for sanction with this office Note of the 21st September 1903.

As the origihal estimates have not been forwarded to me for comparisgn , I am not in a ~~portion~~ position to say whether any material alterations have been made by the Chairman and Board .

11. In my opinion all that was required was for the chairman to have submitted the original projects to Govern ment for formal sanction as these have already had the approval of both myself and of the Committee appointed by Government to formulate proposals for the Mysore City Improvements .

1111

111. If however., the Board considered any modifications in , or addition to, the original estimates desirable , it was only necessary for the Chairman to submit these for approval .

1V I am unable without the original projects before me to give my opinion on the projects but would suggest that the estimates be returned sanctioned subject to the condition that it does not materially differ from the original estimates forwarded with my approval from this office.

I have etc
